

# Sales Module – Materials Entry

- Always use the SI prefix: e.g., si drywall.
- The SI line represents *service/labour*, related materials populate on lines below.
- Entering just “drywall” (without SI) is wrong — the system treats it as labour. Never do this.

When finished, click Sync Materials to send materials back to the Job Entry Module.

**SI**  
**DRYWALL**  
**SI PAINT**  
**SI DOOR**
